DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The two storey house at 135 Church Lane has a stone foundation and off white asbestos shingles which cover the original clapboards attached to the balloon frame. The house is two bays wide and has a main block and a wing in the back of the house(south). The chimney is located in the middle of the gable roof of the wing of the house. The front door is wood, located in the east bay of the north facade of the first storey. Three wood posts support the shed roof porch which has green shingles. The cement floor of the porch is most probably covering a wood floor. The windows of the first and second stories of the north elevation of the house have 6/6 lights and wood frames.

The east side of the house is three bays deep on the first storey. There is a 6/6 light window in the south bay of the wing. The main block has two windows, the one in the south bay has 4/4 lights and there is a 6/6 light window in the north bay. These windows all have wood frames. There is a wood door located in the first storey, south bay of the wing on the west side of the house and there is a 6/6 light window in the north bay. There is a 6/6 light window located in the north bay of the main block on the second storey. The wing of the house seems to possibly be an addition. There is a wood shed behind the house.

----------------	-------------------

STATEMENT OF SIGNIFICANCE

135 Church Lane is typical of late 19th century or early 20th century vernacular architecture, using natural materials such as stone from area quarries.
